

List of TypeScript software and tools

This is a **list of TypeScript software and tools**, including transpilers, runtimes, web frameworks, compilers, integrated development environments, libraries, and other development utilities.

Compilers, transpilers and IDEs

- Babel — JavaScript compiler with TypeScript transpilation support via plugins^[1]
- Bun — JavaScript runtime and toolkit including a package manager, bundler and test runner.^{[2][3]}
- Deno — runtime environment with built-in TypeScript compilation^[4]
- Eclipse Theia — extensible cloud and desktop IDE framework with TypeScript support^[5]
- esbuild — fast JavaScript and TypeScript bundler and transpiler^[6]
- IntelliJ IDEA — IDE supporting TypeScript via plugins
- Node.js — JavaScript runtime commonly used with TypeScript via transpilation^[7]
- StackBlitz — browser-based online IDE optimized for TypeScript and Angular development^[8]
- Sublime Text — text editor with TypeScript plugins^[9]
- SWC — fast Rust-based JavaScript/TypeScript transpiler^[10]
- TypeScript compiler (tsc) — official compiler and type checker developed by Microsoft^[11]
- Visual Studio Code — IDE by Microsoft with built-in TypeScript language service^[12]
- WebStorm — JetBrains IDE with TypeScript support^[13]

Build tools and bundlers

- Parcel — zero-configuration web application bundler^{[14][15]}
- Rollup — bundler optimized for libraries and ES module output^[16]
- Turbopack — incremental bundler developed by Vercel for Next.js applications^{[17][18]}
- Vite — development server and build tool using native ES modules and fast hot module replacement^{[19][20]}
- webpack — module bundler for JavaScript applications with loader-based build pipelines^{[21][22]}

Debuggers and language tools

- Language Server Protocol — protocol used by the TypeScript language service^[23]
- Prettier — code formatter supporting TypeScript^[24]
- ts-node — executes TypeScript directly in Node.js without pre-compilation^[25]

- [Typescript-ESLint](#) — [linting](#) tool integrating TypeScript^[26]

Frameworks

- [AdonisJS](#) — backend framework for Node.js written in TypeScript^[27]
- [Angular](#) — front-end framework developed by Google using TypeScript^[28]
- [Electron](#) — cross-platform desktop application framework ^{[29][30]}
- [Ionic](#) — mobile framework using Angular and TypeScript^[31]
- [NestJS](#) — server-side [Node.js](#) framework inspired by Angular architecture^[32]
- [Next.js](#) — React-based full-stack framework^[33]
- [Nuxt.js](#) — [Vue.js](#)-based full-stack framework^[34]
- [RedwoodJS](#) — full-stack web framework integrating React front end with [GraphQL](#) back end^{[35][36]}
- [Remix](#) — full-stack React framework supporting TypeScript^[37]
- [SolidStart](#) — full-stack framework built on the SolidJS reactive UI library^[38]
- [SvelteKit](#) — application framework supporting TypeScript^[39]
- [T3 Stack](#) — opinionated full-stack web development stack combining Next.js, tRPC and Prisma^{[40][41]}

Libraries and package ecosystem

- [class-validator](#) — decorator-based object validation library^[42]
- [date-fns](#) — modular JavaScript date utility library^[43]
- [InversifyJS](#) — [inversion-of-control](#) container for TypeScript and JavaScript apps^{[44][45]}
- [io-ts](#) — runtime type system and data validation library^[46]
- [Prisma](#) — database toolkit and ORM with TypeScript client^[47]
- [RxJS](#) — reactive programming library using observables for asynchronous and event-based code^{[48][49]}
- [Socket.IO](#) — real-time event-based communication library with TypeScript support
- [TanStack Query](#) — asynchronous state management and data-fetching library for web applications^[50]
- [TensorFlow.js](#) — machine learning library with TypeScript definitions^[51]
- [Three.js](#) — 3D graphics library with official TypeScript typings
- [tRPC](#) — end-to-end typesafe API framework for building client-server applications^{[52][53]}
- [tsyringe](#) — dependency injection container for TypeScript^[54]
- [TypeORM](#) — object-relational mapping library for TypeScript and Node.js^[55]
- [Zod](#) — TypeScript-first schema validation library^[56]

Testing frameworks

- [Cypress](#) — end-to-end testing framework with TypeScript support^[57]
- [Jest](#) — supports TypeScript via [Babel](#) or [ts-jest](#)^[58]

- [Mocha](#) — flexible testing framework supporting TypeScript^[59]
- [Playwright](#) — browser automation and testing framework supporting TypeScript^[60]
- [Testing Library](#) — family of testing utilities, including [React Testing Library](#).^{[61][62]}
- [ts-jest](#) — transformer allowing Jest to run TypeScript sources directly^{[63][64]}
- [Vitest](#) — fast testing framework optimized for [Vite](#) and TypeScript^[65]
